

Providing San Francisco and the Bay Area with state-of-the-art aesthetic treatment.

Located in the heart of San Francisco's Financial District, Urban Allure's staff is dedicated to providing you with the latest in laser hair removal, skin and body rejuvenation, anti-aging treatments, and skincare products.

Urban Allure Treatments:

- Laser Hair Removal
- Intense Pulsed Light/Skin Rejuvenation
- CoolSculpting/Body Contouring
- Cosmetic Injectables
- Chemical Peels
- DiamondGlow/Clinical Facials

The first step is your complimentary consultation.

During your consultation, a treatment provider will carefully examine your face, neck, chest, and hands to check for the kind of sun damage, vascular issues, and pigment irregularities that can be helped with IPL.

Urban Allure offers skin rejuvenation with the Ellipse I2PL pulsed light system. This unique technology uses a special filtering system that is attracted to red and brown pigments. It doesn't matter if you have uneven pigmentation, brown spots from age or sun damage, excessive redness/broken capillaries, or all of the above. The Ellipse I2PL laser enables your treatment provider to customize a treatment profile to fit your specific skin care needs.

Clinical Indication:

Pigmented Lesions

Brown marks

Freckles and Age spots

Vascular Lesions

Red spider veins

Dilated Red Veins

Ellipse I2PL uses short, safe bursts of light emitted from a flash-lamp to treat specific skin conditions. The technology is rather sophisticated, the Ellipse I2PL system very carefully controls the overall delivery of the light-both the amount of light and the speed of its delivery to your specific skin condition are exact and precisely controlled by Ellipse I2PL's built in computer.

What is skin rejuvenation?

Skin rejuvenation treatment with the Ellipse I2PL helps you keep a younger and fresher look. The safe, visible light emitted from the Ellipse I2PL flash-lamp makes your face look younger by removing age spots and diffuse redness, and by improving your skin texture. Uneven pigmentation is also reduced.
